Motor Show Website - Wordpress

Jun 2013 - Jun 2014

Hobbies & Interests

- Public Blockchain
- Economics & Finance
- Graphic design
- Sport, mainly football

Experience

Full-Stack Web Development Student | CareerFoundry

Remote (Part-Time), Apr 2019 - Present

In tandem with a full-time job completed a full-stack web development course, delivering over five projects to hone my skills as a web developer. Consistently provided excellent feedback and timely delivery of tasks.

Highlights:

- Created a native chat application using the React Native Framework with built in image and location sharing features using the Expo library.
- Following a test-driven-development approach, developed a serverless progressive web application (PWA) to display upcoming 'Meetup' events in a selected location.
- Built a full-stack movie database web application with a REST API hosted on a NodeJS server and user-friendly user interface built with React.
- Created a quiz application using the Angular framework.
- Built a simple to do application using the Vue framework.

Computer Aided Design Engineer | Rolls-Royce Plc

Derby UK, Aug 2017 - Present

Consistently deliver designs and engineering drawings to the highest engineering standards exceeding client expectations

Support the management of deliverables to ensure client expectations.
